Central Intelligence Agency

Washington, D.C. 20505

13 JAN 1983

MEMORANDUM FOR:

DDI/OSWR/TTAC

25X1

FROM:

John N. McMahon
Deputy Director of Central Intelligence

SUBJECT:

Memorandum of Appreciation

25X1

1. I note that, under your Chairmanship, a task group of the Solid State Electronics Working Group of the Scientific and Technical Intelligence Committee, has published "A Soviet Microelectronics Technology Transfer Case Study." This study is the first of its kind linking, in a comprehensive manner, the Soviet military use of transferred technology. This is an excellent study and I feel that it will be the analytical standard for future technology transfer studies.

25X1

2. Your contribution to the Intelligence Community is significant and the leadership you exercised as chairman of this STIC working group is greatly appreciated. Thank you for a job well done.

25X1

/S/ John N. McMahon
